The Story of Color in the Movies!

A Live Demonstration! Color images, including movies, are made up of black-and-white images, like these:

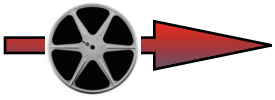

Don't believe it? See for yourself!

If you thought color movies started with *Gone With the Wind* or *The Wizard of Oz*, then you're in for a surprise!

This demonstration reveals many little-known aspects of color photography:

Full color images created from three black-and-white slides!

Silent films in color, even before the advent of color film!

Why archivists love glorious Technicolor!

See examples of Kinemacolor, Technicolor, Kodachrome, Cinecolor, two-color Technicolor, Eastman color, and others. Program runs 90-120 minutes depending on the clips we use.

NO PowerPoint digital hocus-pocus! Everything shown from real film on real projectors!

• **Film equipment provided** • **Historic discussion included** • **NO COPYRIGHT ISSUES** •
